

Building on the Eco-design Directive, EuP Group Analysis (I), Lot 3: Sound & Imaging Equipment

1st Stakeholder Meeting – Questionnaire response

Steve Ogilvie

Questionnaire Responses

8 Responses received to date – more expected

NDA's have been necessary for most cases

Reaching agreed NDAs has introduced a delay in receiving responses.

Some responses are more complete than others

Responders

Responses have been gratefully received from:

- Epson
- Hitachi
- JBMIA (Japanese office machinery group)
- Panasonic
- Philips
- Pioneer
- Sharp
- Sony

Include in the Study?

Video players/recorders

- Majority say 'Yes'
- But some concerns where phase out occurring

Projectors

- Generally, 'No' to digital cinema
- 'Yes' to office and home cinema

Games Consoles & DPFs

- Too few responses to draw any conclusions

Standards

Only 1 response to date supplied additional standards information

Market Data

Very patchy response – some good:others nothing at all

However, amounts placed on the EU market appear to far exceed the 200,000 unit threshold criterion.

(Shortage of data could present difficulties for future stock modelling)

Consumer Behaviour & Infrastructure

Real life efficiency

- Generally, Company environmental policy cited as means to convey credentials
- Service/repair centres focus on components most likely to need replacement during product lifetime

EOL

- WEEE and Green Dot cited
- Some consideration of recycling at the design stage

Infrastructure

- Networked devices can be switched off remotely
- EPG ~1 hour/day daily download – impacts on standby consumption?

Potential Product Cases

We would appreciate more suggestions

However, we could use an average of those already suggested, if necessary.

Existing Measures

Additional items suggested:

Product	Type of measure - ML, VL, VA, OSM ¹	National measure	EU measure	International measure
All products with digital tuner	VA (EU JRC)		Code of Conduct on Energy Efficiency of Digital TV Service systems	
Projector	ML		Lot 6 CE1275/2008	
Projector	VL	JIS X6911		ISO/IEC21118
Projector	ML		LVD (2006/95/EC)	
Projector	ML	Electrical Appliance and Material Safety Act in Japan (PS)E□<PS>E J60950(H19)	EMC (2004/108/EC)	
Projector	VL	S-mark J60950(H19)		
Projectors	VL	Blue Angel Ecolabel schemes in Germany		Korea ecolabel, Taiwan Green Mark.
Laser Pointer	ML	Consumer Products Safety Act in Japan <PS>C
